

This web application aims for participants to create six slogans for six unique cocktails to market the cocktails. The slogans will be one-line. The participants are required to create accounts and then log in. The participants will be randomly assigned into the generative AI (ChatGPT) group and the non-generative AI (ChatGPT) group. Participants will not use generative AI (ChatGPT) to create their slogans in the first round. Participants must be screen-recorded when completing the tasks to ensure the integrity of the experiments. Participants will not use generative AI (ChatGPT) in the first iteration for either group.

This document is a redesign of Jia\_Wireframe#1.

I am grateful to all my peers for providing the inputs on my design, and I am grateful to my peers for sharing their designs with me.
